

# Oetiker Full Flow Swing Couplings

The Oetiker Swing Coupling SC is a unique safety coupling designed to improve the efficiency and safety of compressed air lines. OETIKER Swing Couplings allow unrestricted full air flow and safe, quick connection and disconnection under pressure. Durability, reliability and simplicity are features of all OETIKER Swing Couplings.

A broad product range and an extensive choice of seals and lubricants mean that OETIKER Couplings are suitable for many applications throughout various industries. The coupling is applicable to various media, both gases and liquids, including breathing air.
